On motion of \_\_\_\_\_, which carried \_\_\_\_, the following resolution was adopted:

A RESOLUTION TO APPROVE A MINOR AMENDMENT TO SPECIAL USE PERMIT NO. UP-531-98 TO AUTHORIZE AN INCREASE IN HEIGHT OF A SELF-SUPPORTING MONOPOLE COMMUNICATIONS TOWER WITH ASSOCIATED EQUIPMENT, AT YORK COUNTY FIRE STATION NO. 6, FROM A HEIGHT OF 150 FEET TO 160 FEET

WHEREAS, VoiceStream Wireless has submitted a request seeking an amendment to Special Use Permit No. UP-531-98, pursuant to Section 24.1-115(d)(2) of the York County Zoning Ordinance, to authorize an increase in height of a freestanding monopole communications tower with associated equipment from a height of 150-feet to 160 feet in total height on the parcel located at 503 Back Creek Road (Fire Station No. 6) and further identified as Assessor's Parcel No. 25-205; and

WHEREAS, the Board has carefully considered the recommendations of the staff with respect to this application;

NOW, THEREFORE, BE IT RESOLVED by the York County Board of Supervisors this the \_\_\_\_ day of \_\_\_\_\_, 2002, that Special Use Permit No. UP-531-98 be, and it is hereby, amended to authorize a 10-foot increase in height of an existing 150-foot freestanding monopole communications tower with associated equipment at 503 Back Creek Road (Fire Station No. 6), subject to the following conditions, as amended and restated:

1. This use permit shall authorize the construction and maintenance of a freestanding monopole communications tower, with associated equipment, which shall not exceed 160 feet in height.
2. A site plan prepared in accordance with Article V of the York County Zoning Ordinance shall be submitted to and approved by the County prior to commencement of land clearing or any construction activity on the subject property. Except as modified herein, said plan shall substantially adhere to the plan submitted by the applicant, dated October 24, 2001, a copy of which is located in the application files for this request maintained by the York County Department of Environmental and Development Services. In addition, as part of the site plan submittal, the applicant shall prepare a frequency intermodulation study to determine the impact on current communication transmission for the York County Departments of Fire and Life Safety and General Services, Sheriff's Office, and the Intrac Sewer Telemetry System. Should any equipment associated with this facility at any time during the operation of the tower be found by the County to cause interference with County communications, the applicant shall be responsible for the elimination of said interference within twenty-four (24) hours of receipt of notice from the County.
3. Prior to site plan approval, the applicant shall submit written statements from the Federal Aviation Administration, Federal Communications Commission, and any other review authority with jurisdiction over the tower, stating that the proposed tower complies with regulations administered by that agency or that the tower is exempt from those regulations. No building permit for the tower authorized by this special use permit shall be issued until the applicant provides evidence that the Federal Aviation Administration (FAA) has granted a permit for said tower, if one is required.
4. A report from a registered structural or civil engineer shall be submitted indicating tower height and design, structure installation, and total anticipated capacity of the structure (including number and types of users that the structure can accommodate). These data shall satisfactorily demonstrate that the proposed tower conforms to all structural requirements of the Uniform Statewide Building Code and shall set out whether the tower will meet the structural requirement of EIA-222E, "Structural Standards for Steel Antenna Towers and Antenna Supporting Structures."
5. Advertising or signage on the tower shall be prohibited, except for warning signs associated with the operation of the tower or its equipment.
6. As part of the site plan submittal, a landscape plan shall be included which is consistent with Section 24.1-242 of the Zoning Ordinance. The base of the tower, including related equipment, shall be screened from view utilizing ever-green planting material or material deemed acceptable by the County.

7. The equipment building and associated equipment shall be completely enclosed by a security fence.
8. The applicant shall comply with all performance standards specified in Sections 24.1-493 and 24.1-494 of the Zoning Ordinance
9. The communication tower shall have a galvanized finish that is grey in color. No lighting or multi-color painting shall be authorized without approval of the York County Board of Supervisors by resolution.
10. No microwave dishes, conical shaped antennae, or other dish shall be permitted on the tower without approval of the York County Board of Supervisors by resolution. Photo simulations of the visual impacts of such antennae shall be provided to the Board prior to its decision.
11. The maintenance access road used to support the tower shall be constructed to the satisfaction of the York County Fire and Life Services Department and the York County Department of General Services.
12. The communications tower shall be structurally designed and constructed to accommodate no fewer than three (3) wireless users capable of supporting either PCS or cellular antenna arrays. The applicant shall reserve at least one (1) space on the tower for two (2) antennae for use by the County. Both the reservation for the County and the use by the County shall be at no cost to the County for as long as the County uses the tower. Should FAA requirements preclude a 150-foot height request, the tower shall be permitted at such lower height approved by the FAA.
13. If at any time the communications tower shall cease its operation, the property owner shall dismantle and remove the tower within six (6) months from the date the tower ceases to operate, unless the owner shall present evidence satisfactory to the Zoning Administrator that a binding lease with another wireless user has been executed or will be within a reasonable period of time.
14. In accordance with Section 24.1-115(b)(7) of the York County Zoning Ordinance, a certified copy of the resolution authorizing this special use permit shall be recorded at the expense of the applicant in the name of the property owner as grantor in the office of the Clerk of the Circuit Court.
